# B.M.S. College of Engineering, Bengaluru-560019

Autonomous Institute Affiliated to VTU

## September / October 2024 Supplementary Examinations

Programme: B.E.

Branch: Civil Engineering

Course Code: 22CV5PCSSA

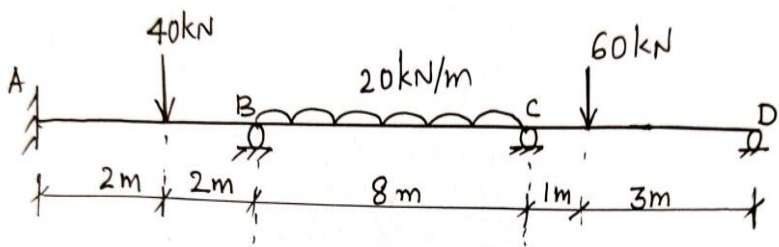

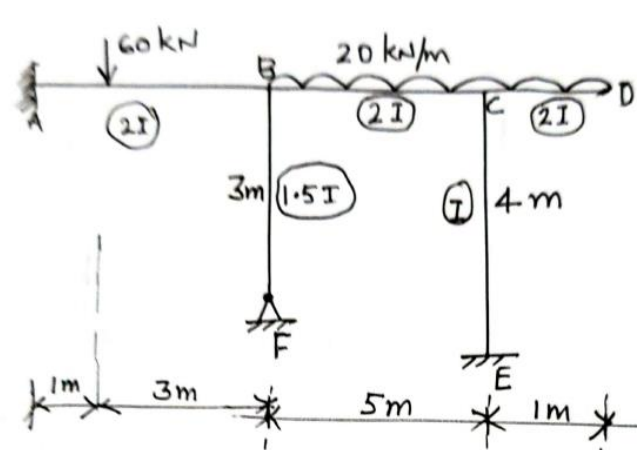

Course: Structural System Analysis

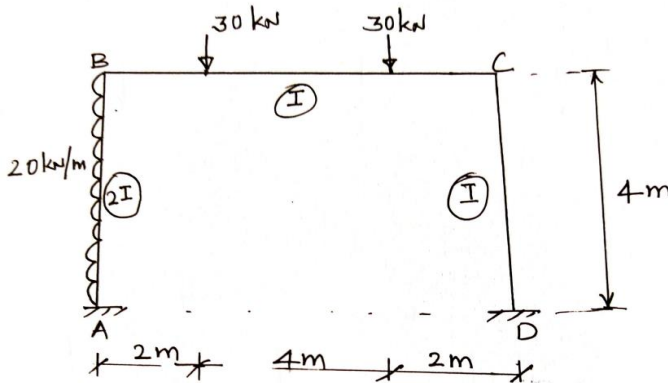

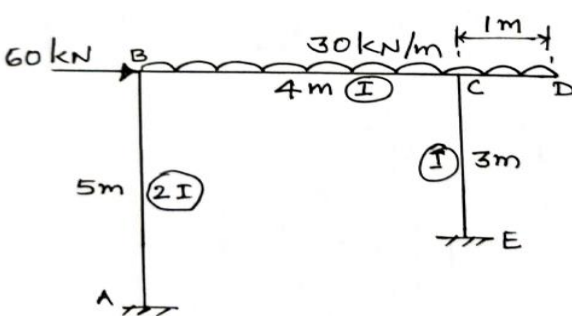

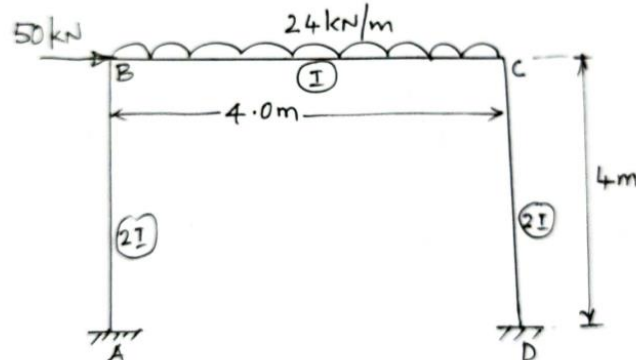

Semester: V

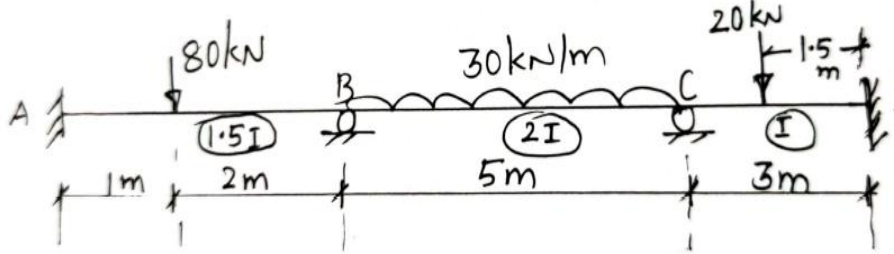

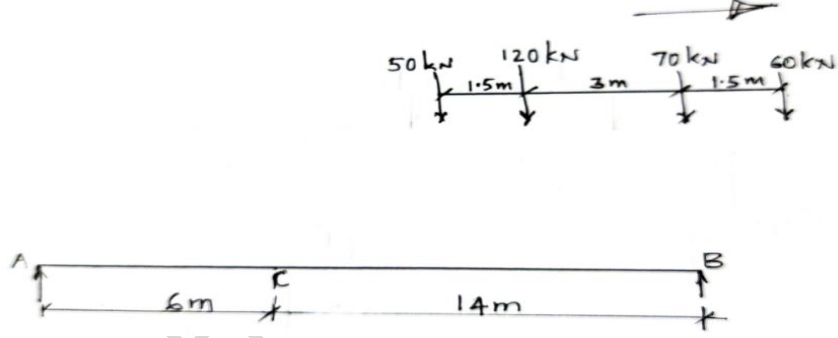

Duration: 3 hrs.

Max Marks: 100

**Instructions:** 1. Answer any FIVE full questions, choosing one full question from each unit.  
2. Missing data, if any, may be suitably assumed.

			UNIT - 1	CO	PO	Marks
Important Note: Completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages. Revealing of identification, appeal to evaluator will be treated as malpractice.	1		<p>Analyze the continuous beam shown in Fig Q(1) using Slope – Deflection method. Draw the BMD and Elastic curve. The support B sinks by 5 mm. Assume <math>EI=8000 \text{ kN-m}^2</math> and constant for all members.</p>  <p style="text-align: center;">FigQ1</p>	CO1	PO1 PO2	20
	2.		<p>In the rigid frame shown in Fig Q 2 the support , A sinks by 3 mm. Analyze the frame using Moment Distribution method. Sketch the BMD and the elastic curve. Assume <math>EI=8000 \text{ kN-m}^2</math></p>  <p style="text-align: center;">Fig Q2</p>	CO1	PO1 PO2	20

		<b>UNIT-3</b>			
3.		<p>Analyze the orthogonal rigid frame shown in Fig Q3 by slope-deflection method. Sketch the BMD and the elastic curve.</p>  <p style="text-align: center;">Fig Q3</p>	CO1	PO1, PO2	<b>20</b>
		<b>OR</b>			
4		<p>Analyze the rigid frame shown in Fig Q4 by Moment Distribution method. Sketch the BMD and the elastic curve.</p>  <p style="text-align: center;">Fig Q4</p>	CO1	PO1, PO2	<b>20</b>
		<b>UNIT - 4</b>			
5		<p>Analyze the rigid frame shown in FigQ5 using direct stiffness method and draw BMD &amp; Elastic curve.</p>  <p style="text-align: center;">Fig Q5</p>	CO2	PO1, PO2	<b>20</b>

		<b>OR</b>			
6		<p>Analyze the continuous beam shown in Fig Q6 by using direct stiffness method. Support B sinks by 4 mm. Assume <math>EI=8000 \text{ kN-m}^2</math></p>  <p style="text-align: center;">Fig Q6</p>	CO2	PO1 PO2	20
		<b>UNIT - 5</b>			
7		<p>A series of wheel loads 60 kN, 70 kN, 120 kN and 50 kN spaced at 1.5m, 3m and 1.5 m crosses over a simply supported girder of span 20 m from left to right with 60 kN leading as shown in FigQ7(b). Determine</p> <ol style="list-style-type: none"> <li>Maximum BM and SF at 6 m from left support</li> <li>Maximum BM under 60 kN load</li> <li>Absolute maximum BM and SF</li> <li>Equivalent udl</li> </ol>  <p style="text-align: center;">FigQ7(b).</p>	CO3	PO1 PO2	20
