Q.11 to Q.15 are based on the following passage:

The increasing prevalence of "fake news" and misinformation online poses a significant threat to informed public discourse. The rapid spread of fabricated or misleading information through social media platforms can have profound consequences, influencing public opinion, electoral outcomes, and even social stability. While the internet has democratized access to information, it has also created an environment where false narratives can proliferate unchecked. One contributing factor is the algorithmic nature of many social media platforms, which often prioritise engagement and virality over accuracy and factual verification. This can create "echo chambers" where users are primarily exposed to information that confirms their existing biases, reinforcing misinformation and hindering critical thinking.

Addressing this challenge requires a multi-pronged approach. Media literacy education plays a crucial role in equipping individuals with the skills to critically evaluate information and identify potential sources of bias. Furthermore, social media companies have a responsibility to implement measures to curb the spread of misinformation on their platforms, while respecting freedom of expression. Fact-checking organizations and independent journalism play a vital role in debunking false claims and providing accurate information. Ultimately, combating the spread of fake news requires a collective effort from individuals, educational institutions, media organizations, and technology companies.

11. What is the main concern discussed in the passage?

(A) The impact of social media on political campaigns.

(B) The spread of "fake news" and misinformation online.

(C) The role of technology companies in regulating online content.

(D) The decline of traditional journalism in the digital age.

12. According to the passage, what is one factor contributing to the spread of misinformation?

- (A) The lack of access to the internet in certain communities.
- (B) The algorithmic nature of social media platforms.
- (C) The increasing cost of traditional news subscriptions.
- (D) The limited availability of fact-checking resources.

13. The passage suggests that combating fake news requires:

- (A) Stricter government regulation of online content.
- (B) A multi-pronged approach involving various stakeholders.
- (C) The complete elimination of anonymity on social media platforms.
- (D) The development of advanced AI-powered fact-checking tools.

14. The author implies that "echo chambers" on social media:

- (A) Promote diverse perspectives and encourage critical thinking.
- (B) Reinforce existing biases and hinder objective evaluation of information.
- (C) Have a minimal impact on public opinion and electoral outcomes.
- (D) Are primarily caused by malicious actors intentionally spreading misinformation.

15. The passage suggests that social media companies should:

- (A) Prioritise profit maximization over the accuracy of information shared on their platforms.
- (B) Implement measures to curb misinformation while respecting freedom of expression.
- (C) Remain completely neutral and avoid any involvement in content moderation.
- (D) Outsource all content moderation to third-party fact-checking organizations.
