B.M.S. College of Engineering, Bengaluru-560019

Autonomous Institute Affiliated to VTU

September / October 2023 Semester End Main Examinations

Programme: B.E.

Branch: Chemical Engineering

Course Code: 22MA4BSSAP

Course: Statistics and Probability

Semester: IV

Duration: 3 hrs.

Max Marks: 100

Date: 20.09.2023

Instructions: 1. Answer any FIVE full questions, choosing one full question from each unit.
 2. Missing data, if any, may be suitably assumed.
 3. Use of Statistical tables is permitted.

UNIT – I			<i>CO</i>	<i>PO</i>	Marks																
Important Note: Completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages. Revealing of identification, appeal to evaluator will be treated as malpractice.	1	a)	<p>The following table gives the results of the measurements of train resistance. V is the velocity in miles per hour, R is the resistance in pounds per tonne. If R is related to V by the relation $R = a + bV + cV^2$, find a, b and c for the following table.</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">V</td><td style="text-align: center;">2</td><td style="text-align: center;">4</td><td style="text-align: center;">6</td><td style="text-align: center;">8</td><td style="text-align: center;">10</td></tr> <tr> <td style="text-align: center;">R</td><td style="text-align: center;">5.5</td><td style="text-align: center;">9.1</td><td style="text-align: center;">14.9</td><td style="text-align: center;">22.8</td><td style="text-align: center;">33.3</td></tr> </table>	V	2	4	6	8	10	R	5.5	9.1	14.9	22.8	33.3	<i>CO1</i>	<i>PO1</i>	6			
	V	2	4	6	8	10															
	R	5.5	9.1	14.9	22.8	33.3															
	b)	<p>The following table represents the magnitude of earthquake (x) and the depth below the surface at the epicentre (y) (in kilometres).</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">Magnitude (x)</td><td style="text-align: center;">7.5</td><td style="text-align: center;">6.5</td><td style="text-align: center;">7.0</td><td style="text-align: center;">7.0</td><td style="text-align: center;">4.0</td><td style="text-align: center;">4.0</td><td style="text-align: center;">7.0</td></tr> <tr> <td style="text-align: center;">Depth(y)</td><td style="text-align: center;">35</td><td style="text-align: center;">18</td><td style="text-align: center;">17</td><td style="text-align: center;">26</td><td style="text-align: center;">5</td><td style="text-align: center;">10</td><td style="text-align: center;">25</td></tr> </table> <p>Find the correlation coefficient between the magnitude of the earthquake and the depth. Hence find the regression lines.</p>	Magnitude (x)	7.5	6.5	7.0	7.0	4.0	4.0	7.0	Depth(y)	35	18	17	26	5	10	25	<i>CO1</i>	<i>PO1</i>	7
Magnitude (x)	7.5	6.5	7.0	7.0	4.0	4.0	7.0														
Depth(y)	35	18	17	26	5	10	25														
	c)	<p>Given that 2% of the fuses manufactured by a firm are defective, find the probability that a box containing 200 fuses has (i) no defective fuse, (ii) at least one defective fuse, (iii) between 2 and 4 defective fuses.</p>	<i>CO2</i>	<i>PO1</i>	7																
OR																					
	2	a)	<p>By the method of least squares, fit a curve of the form $y = ab^x$ to the following data:</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">x</td><td style="text-align: center;">2</td><td style="text-align: center;">3</td><td style="text-align: center;">4</td><td style="text-align: center;">5</td><td style="text-align: center;">6</td></tr> <tr> <td style="text-align: center;">y</td><td style="text-align: center;">144</td><td style="text-align: center;">172.8</td><td style="text-align: center;">207.4</td><td style="text-align: center;">248.8</td><td style="text-align: center;">298.6</td></tr> </table>	x	2	3	4	5	6	y	144	172.8	207.4	248.8	298.6	<i>CO1</i>	<i>PO1</i>	6			
	x	2	3	4	5	6															
y	144	172.8	207.4	248.8	298.6																
	b)	<p>The table shows the heights (x in feet) and trunk diameters (y in inches) of eight trees.</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">x</td><td style="text-align: center;">70</td><td style="text-align: center;">72</td><td style="text-align: center;">75</td><td style="text-align: center;">76</td><td style="text-align: center;">85</td><td style="text-align: center;">78</td><td style="text-align: center;">77</td></tr> <tr> <td style="text-align: center;">y</td><td style="text-align: center;">8</td><td style="text-align: center;">10</td><td style="text-align: center;">11</td><td style="text-align: center;">12</td><td style="text-align: center;">15</td><td style="text-align: center;">14</td><td style="text-align: center;">16</td></tr> </table> <p>Find both the lines of regression and the correlation coefficient.</p>	x	70	72	75	76	85	78	77	y	8	10	11	12	15	14	16	<i>CO1</i>	<i>PO1</i>	7
x	70	72	75	76	85	78	77														
y	8	10	11	12	15	14	16														

	c)	The weekly wages of workers in a company are normally distributed with mean of Rs 700 and standard deviation of Rs 50. Find the probability that the weekly wages of a randomly chosen worker is (i) less than 800, (ii) between Rs 650 and Rs 750, (iii) more than Rs 600.	CO2	PO1	7																
		UNIT – II																			
3	a)	A machine is used for a particular job in the forenoon and for a different job in the afternoon. The joint probability distribution of (X, Y) , where X and Y represent the number of times the machine breaks down in the forenoon and in the afternoon respectively, is given in the following table. Find $\rho(X, Y)$.	CO1	PO1	6																
		<table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td>X→ Y↓</td> <td>0</td> <td>1</td> <td>2</td> </tr> <tr> <td>0</td> <td>0.1</td> <td>0.04</td> <td>0.06</td> </tr> <tr> <td>1</td> <td>0.2</td> <td>0.08</td> <td>0.12</td> </tr> <tr> <td>2</td> <td>0.2</td> <td>0.08</td> <td>0.12</td> </tr> </table>	X→ Y↓	0	1	2	0	0.1	0.04	0.06	1	0.2	0.08	0.12	2	0.2	0.08	0.12			
X→ Y↓	0	1	2																		
0	0.1	0.04	0.06																		
1	0.2	0.08	0.12																		
2	0.2	0.08	0.12																		
	b)	Assume that a computer system is in one of the three states: busy, idle or undergoing repair denoted by states 0, 1, 2. Observing its state at a certain specified time on each day, it is found that the system approximately behaves like a Markov chain with the transition probability matrix $P = \begin{bmatrix} 0.5 & 0.3 & 0.2 \\ 0.2 & 0.7 & 0.1 \\ 0.4 & 0 & 0.6 \end{bmatrix}$. Prove that the chain is irreducible and determine the steady state probabilities.	CO2	PO1	7																
	c)	In a cascade of binary communication channels, the signals 1 and 0 are transmitted in successive stages. In any stage the probability of a transmitted 1 is received as a 1 is 0.75 and the probability of a transmitted 0 is received as a 0 is 0.5. If the probability of transmitting a 1 in the initial stage is $5/8$, find the probability of receiving (i) 1 in the fourth stage, (ii) 0 in the fourth stage.	CO2	PO1	7																
		UNIT – III																			
4	a)	A new variety of potato grown in 250 plots gave rise to a mean yield of 82.7 quintals per hectare with a standard deviation of 14.6 quintals per hectare. At 1% level of significance, is it reasonable to assert that the new variety is superior in yield to the standard variety with an established mean yield of 80.2 quintals per hectare?	CO2	PO1	6																
	b)	The mean yield of two sets of plots and their variability are as given below. Examine whether the difference in the variability in yields is significant.	CO3	PO6	7																
		<table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th></th> <th>Set of 40 plots</th> <th>Set of 60 plots</th> </tr> </thead> <tbody> <tr> <td>Mean yield per plot</td> <td>1258 kg</td> <td>1243 kg</td> </tr> <tr> <td>S.D. per plot</td> <td>34</td> <td>28</td> </tr> </tbody> </table>		Set of 40 plots	Set of 60 plots	Mean yield per plot	1258 kg	1243 kg	S.D. per plot	34	28										
	Set of 40 plots	Set of 60 plots																			
Mean yield per plot	1258 kg	1243 kg																			
S.D. per plot	34	28																			

	c)	In a city A, 20% of a random sample of 900 school boys had a certain physical defect. In another city B, 18.5 % of a random sample of 1600 school boys had the same defect. Is the difference between the proportions significant?	CO3	PO6	7																						
		UNIT – IV																									
5	a)	Measurements on the length of a copper wire were taken in 2 experiments A and B as under: <table border="1" style="display: inline-table; vertical-align: middle;"> <tr><td>A's (mm)</td><td>12.29</td><td>12.25</td><td>11.86</td><td>12.13</td><td>12.44</td><td>12.78</td><td>12.77</td><td>11.9</td><td>12.47</td></tr> <tr><td>B's (mm)</td><td>12.39</td><td>12.46</td><td>12.34</td><td>12.22</td><td>11.98</td><td>12.46</td><td>12.23</td><td>12.06</td><td>-</td></tr> </table> Test whether B's measurements are more accurate than A's.	A's (mm)	12.29	12.25	11.86	12.13	12.44	12.78	12.77	11.9	12.47	B's (mm)	12.39	12.46	12.34	12.22	11.98	12.46	12.23	12.06	-	CO3	PO6	6		
A's (mm)	12.29	12.25	11.86	12.13	12.44	12.78	12.77	11.9	12.47																		
B's (mm)	12.39	12.46	12.34	12.22	11.98	12.46	12.23	12.06	-																		
	b)	A group of 10 rats fed on a diet A and another group of 8 rats fed on a different diet B, recorded the following increase in weights. <table border="1" style="display: inline-table; vertical-align: middle;"> <tr><td>Diet A</td><td>5</td><td>6</td><td>8</td><td>1</td><td>12</td><td>4</td><td>3</td><td>9</td><td>6</td><td>10</td></tr> <tr><td>Diet B</td><td>2</td><td>3</td><td>6</td><td>8</td><td>10</td><td>1</td><td>2</td><td>8</td><td>-</td><td>-</td></tr> </table> Does it show the superiority of diet A over that of B when the analysis is performed by considering their average weights?	Diet A	5	6	8	1	12	4	3	9	6	10	Diet B	2	3	6	8	10	1	2	8	-	-	CO3	PO1	7
Diet A	5	6	8	1	12	4	3	9	6	10																	
Diet B	2	3	6	8	10	1	2	8	-	-																	
	c)	Given the following contingency table for hair colour and eye colour. Using Chi Square check if there is a good association between the hair and eye color? <table border="1" style="display: inline-table; vertical-align: middle;"> <tr><th colspan="2" rowspan="2"></th><th colspan="3">Hair color</th></tr> <tr><th>Eye color</th><th>Fair</th><th>Brown</th><th>Black</th></tr> <tr><th rowspan="3">Blue</th><td>15</td><td>5</td><td>20</td></tr> <tr><th rowspan="2">Grey</th><td>20</td><td>10</td><td>20</td></tr> <tr><th>Brown</th><td>25</td><td>15</td><td>20</td></tr> </table>			Hair color			Eye color	Fair	Brown	Black	Blue	15	5	20	Grey	20	10	20	Brown	25	15	20	CO3	PO1	7	
		Hair color																									
		Eye color	Fair	Brown	Black																						
Blue	15	5	20																								
	Grey	20	10	20																							
		Brown	25	15	20																						
		OR																									
6	a)	According to a dietary study, a high sodium intake may be related to ulcers, stomach cancer and migraine headaches. The human requirement for salt is only 220 milligrams per day, which is surpassed in most of ready-to-eat foods. If a random of 20 such ready-to-eat foods showed mean sodium content of 244 milligrams with a standard deviation of 24.5 milligrams, does this suggest that the average sodium content in ready-to-eat foods exceed 220 milligrams?	CO1 CO2	PO1	6																						
	b)	The number of cars passing a given point was observed as follows: <table border="1" style="display: inline-table; vertical-align: middle;"> <tr><td>x</td><td>0</td><td>1</td><td>2</td><td>3</td><td>4</td></tr> <tr><td>f</td><td>419</td><td>352</td><td>154</td><td>56</td><td>19</td></tr> </table> Fit a Poisson distribution to the data and test the goodness of fit.	x	0	1	2	3	4	f	419	352	154	56	19	CO1 CO2	PO1	7										
x	0	1	2	3	4																						
f	419	352	154	56	19																						

	c)	<p>Eleven school boys were given a test in Mathematics carrying a maximum of 25 marks. They were given a month's extra coaching and a second test of equal difficulty was held thereafter. The following table gives the marks in the two tests.</p> <table border="1"> <tr><td>Test 1</td><td>23</td><td>20</td><td>19</td><td>21</td><td>18</td><td>20</td><td>18</td><td>17</td><td>23</td><td>16</td><td>19</td></tr> <tr><td>Test 2</td><td>24</td><td>19</td><td>22</td><td>18</td><td>20</td><td>22</td><td>20</td><td>20</td><td>23</td><td>20</td><td>17</td></tr> </table> <p>Do the marks give evidence that the students have benefitted by extra coaching? Use 5% level of significance.</p>	Test 1	23	20	19	21	18	20	18	17	23	16	19	Test 2	24	19	22	18	20	22	20	20	23	20	17	CO3	PO6	7
